Note 6

mkdir

- **Definition:**
  - Creates a new directory.
- **Usage:**
  - `mkdir` + `directory_name`
- **Example:**
- mkdir website
- mkdir documents pictures
- mkdir -p website/assets/images

touch

- **Definition:**
  - Creates an empty file
- **Usage:**
  - `touch` + `file_name`
- **Example:**
- touch notes.txt
- touch index.html
- touch file1.txt file2.txt

rm

- **Definition:**
  - Removes files or directories
- **Usage:**
  - `rm` + `file_name`
  - `rm` + `-r directory_name`
- **Example:**
- rm notes.txt
- rm image.png
- rm -r website

cp

- **Definition:**
  - Copies files or directories to another location.
- **Usage:**
  - `cp` + `source destination`
  - `cp` + `-r source_directory destination`
- **Example:**
- cp notes.txt backup.txt
- cp image.png ~/Pictures/

- cp -r website website-backup

mv

- **Definition:**
  - Moves a file or directory. It is also used to rename files and directories.
- **Usage:**
  - `mv` + `source destination`
- **Example:**
- Move a file:`mv old-name.txt new-name.txt`
- Rename a file:`mv old-name.txt new-name.txt`
- Move and rename at the same time: `mv recording.gif ~/lab6-challenge2/slideshow.gif`
